

ENVIRONMENTAL POLICY

To support our ethos of supplying Green Energy Solutions, CooperOstlund is committed to:

- The prevention of pollution
- Compliance with environmental legislation
- Continually improving our impact on the environment.

To achieve these aims we will:

- Assess the environmental impact of all our business activities from design through to administration, installation and service;
- Apply more stringent criteria than those required by law where we believe this appropriate;
- Use standards of environmental impact assessment which are robust, technically sound and generally acceptable within the present state of knowledge, at the same time attempting to develop superior methods and to improve on current practice;
- Develop objectives for environmental management and continual improvement which are based on our significant environmental objectives which will be continually monitored and reviewed;
- Develop and apply systems of environmental management as part of day-to-day operational practice and ongoing control procedures
- Encourage our suppliers to develop environmentally superior processes and products and co-operate with other members of the supply chain to improve overall environmental performance
- Where appropriate, work with industry leaders, government agencies, business partners and other concerned organisations to promote environmental care, increase knowledge and disseminate best practice
- Ensure that employees are aware of this environmental policy and motivated to apply it. That they are aware of their own responsibilities and are given the training and support to enable them to meet those responsibilities
- Remain alert and responsive to developing issues, knowledge and public concerns.
